Smile Styles/Edge Design

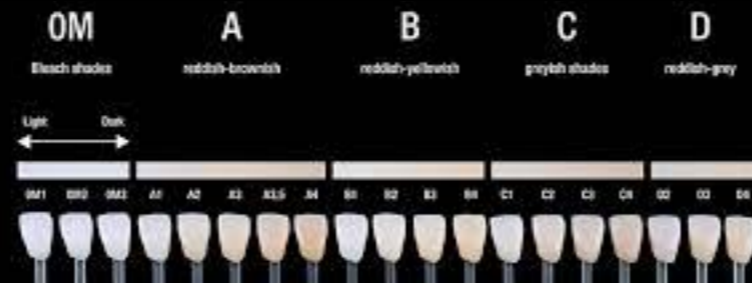

Pontic Design

Pontic design	Appearance	Recommended location	Advantages	Disadvantages	Indications	Contraindications
Sanitary/hygienic	2 mm	Posterior mandible	Good access for oral hygiene	Poor esthetics	Nonesthetic zones Impaired oral hygiene	Where esthetics is important Minimal vertical dimension
Saddle-ridge-lap		Not recommended	Esthetic	Not amenable to oral hygiene	Not recommended	Not recommended
Conical		Molars without esthetic requirements	Good access for oral hygiene	Poor esthetics	Posterior areas where esthetics is of minimal concern	Poor oral hygiene
Modified ridge-lap		High esthetic requirement (i.e., anterior teeth and premolars, some maxillary molars)	Good esthetics	Moderately easy to clean	Most areas with esthetic concern	Where minimal esthetic concern exists
Ovate		Very high esthetic requirement Maxillary incisors, canines, and premolars	Superior esthetics Negligible food entrapment Ease of cleaning	Requires surgical preparation Not for residual ridge defects	Desire for optimal esthetics High smile line	Unwillingness for surgery Residual ridge defects
